TEST CASES

6

MODULES

100%

COVERAGE TARGET

Application under test: **localhost:3000** (CreativeHub Events Platform)

Prepared by: **Muki** — QA Engineer

Test types: **UI Functional, Styling/CSS, Form Validation, End-to-End**

Side Panel TC-01 – TC-03

SETUP (BEFORE EACH TEST)

User opens `http://localhost:3000/` in a browser with a maximized window.

TC-01

Side Panel Text Validation

1. User clicks on the Menu icon
2. User verifies that the Home button displays the text "Home"
3. User verifies that the Events button displays the text "Events"
4. User verifies that the Contact button displays the text "Contact"
5. User verifies that the Login button displays the text "Login"

TC-02

Side Panel Font Validation

1. User clicks on the Menu icon
2. User verifies that the font family of the Home, Events, Contact, and Login buttons is "Josefin Sans"
3. User verifies that the font style of the Home, Events, Contact, and Login buttons is "normal"

TC-03

Close Side Panel

1. User clicks on the Menu icon
2. User waits 1 second
3. User clicks on the Close Menu button
4. User verifies that the side panel menu is closed

Login & Signup Page

TC-04 – TC-20

SETUP (BEFORE EACH TEST)

User opens `http://localhost:3000/` in a maximized window, then clicks on the Login menu button.

TC-04 Validate Title on Login Page

1. User verifies that the page title displayed is "Log in"

TC-05 Validate Email and Password Field Labels

1. User verifies that the Email field label is "E-Mail"
2. User verifies that the Password field label is "Password"

TC-06 Validate Button Text

1. User verifies that the GO button displays the text "GO"
2. User verifies that the CREATE USER button displays the text "CREATE USER"

TC-07 Validate Font on Email Field

1. User verifies that the font family of the Email field is "Josefin Sans"
2. User verifies that the font style of the Email field is "normal"

TC-08 Validate Button Colors

1. User verifies that the GO button color is `#304ffe`
2. User verifies that the CREATE USER button color is `#9c27b0`

TC-09 Validate CREATE USER Button Changes Text When Clicked

1. User clicks on the CREATE USER button
2. User verifies that the button text has changed to "LOG IN"

TC-10 Validate Error Message When Submitting Empty Login Form

1. User clicks on the GO button without entering any credentials
2. User verifies that the error message displayed is "Authentication failed."

TC-11**Login With Invalid Email and Password**

1. User types "email.email@mail.com" into the Email field
2. User types "password123" into the Password field
3. User clicks on the GO button
4. User verifies that the error message displayed is "Authentication failed."

TC-12**Login With Email Only (No Password)**

1. User types "email.email@email.com" into the Email field
2. User clicks on the GO button without entering a password
3. User verifies that the error message displayed is "Authentication failed."

TC-13**Validate URL After Clicking CREATE USER Button**

1. User clicks on the CREATE USER button
2. User verifies that the URL has changed to the create user/signup page

TC-14**Validate Error Messages When Submitting Empty Signup Form**

1. User clicks on the CREATE USER button
2. User clicks on the GO button without entering any data
3. User verifies error message 1 is "Invalid email."
4. User verifies error message 2 is "Invalid password. Must be at least 6 characters long."
5. User verifies error message 3 is "User signup failed due to validation errors."

TC-15**Validate Error Message When Signing Up With Invalid Email Format**

1. User clicks on the CREATE USER button
2. User types "eeeeee" into the Email field
3. User types "password123!" into the Password field
4. User clicks on the GO button
5. User verifies error message 1 is "Invalid email."
6. User verifies error message 3 is "User signup failed due to validation errors."

TC-16**Validate Error Message When Signing Up With Invalid Password (Too Short)**

1. User clicks on the CREATE USER button
2. User types "mail.mail@mail.com" into the Email field
3. User types "1" into the Password field
4. User clicks on the GO button
5. User verifies error message 1 is "Invalid password. Must be at least 6 characters long."
6. User verifies error message 3 is "User signup failed due to validation errors."

TC-17**Successfully Sign Up**

1. User clicks on the CREATE USER button
2. User types "final.project@creativehub.mk" into the Email field
3. User types "creativeHub123!" into the Password field
4. User clicks on the GO button

TC-18**Sign Up With Already Existing Email**

1. User clicks on the CREATE USER button
2. User types "final.project@creativehub.mk" into the Email field
3. User types "creativeHub123!" into the Password field
4. User clicks on the GO button
5. User verifies error message 1 is "Email exists already."
6. User verifies error message 3 is "User signup failed due to validation errors."

TC-19**Log Out**

1. User types "final.project@creativehub.mk" into the Email field
2. User types "creativeHub123!" into the Password field
3. User clicks on the GO button
4. User clicks on the Log Out button
5. User verifies that the user is no longer logged in

TC-20**Successfully Log In**

1. User types "final.project@creativehub.mk" into the Email field
2. User types "creativeHub123!" into the Password field
3. User clicks on the GO button
4. User verifies that the user is successfully logged in

Contacts Page TC-21 – TC-31

SETUP (BEFORE EACH TEST)

User opens `http://localhost:3000/` in a maximized window, then clicks on the Contact button.

TC-21 Validate Page Title and URL

1. User verifies that the current URL is `http://localhost:3000/contact`
2. User verifies that the page title is "Want to reach out?"

TC-22 Validate Border Thickens on Hover Over Name Field

1. User verifies that the Name field border width is "0.8px" (before hovering)
2. User hovers over the Name field
3. User verifies that the Name field border width is "1.6px" (after hovering)

TC-23 Validate Error Message When Name Field Is Empty

1. User clicks on the Send button without entering any data
2. User verifies that the error message for the Name field is "Please fill out this field."

TC-24 Validate Error Message When Email Field Is Empty

1. User types "newuser" into the Name field
2. User clicks on the Send button without entering an email
3. User verifies that the error message for the Email field is "Please fill out this field."

TC-25 Validate Error Messages for Multiple Invalid Email Formats

1. User types "email.com" into the Email field → verifies error "Please include an '@' in the email address. 'email.com' is missing an '@'."
2. User clears the field, types "email@.com" → verifies error "'.' is used at a wrong position in '.com'."
3. User clears the field, types "email@" → verifies error "Please enter a part following '@'. 'email@' is incomplete."
4. User clears the field, types "email@@" → verifies error "A part following '@' should not contain the symbol '@'."

TC-26**Validate Error Message When Message Field Is Empty**

1. User types "username" into the Name field
2. User types "email@email.com" into the Email field
3. User clicks on the Send button without entering a message
4. User verifies that the error message for the Message field is "Please fill out this field."

TC-27**Successfully Send a Reach Out Message**

1. User types "username" into the Name field
2. User types "email@email.com" into the Email field
3. User types "we are done testing this field" into the Message field
4. User clicks on the Send button
5. User verifies that no error message is displayed

TC-28**Validate Send Button Color**

1. User verifies that the Send button color is `#304ffe`

TC-29**Validate Footer Data**

1. User verifies that the footer address is "Rampo Lefkata 1"
2. User verifies that the footer email is "ev@rampo.com"
3. User verifies that the footer phone number is "+389 75 500 000"

TC-30**Validate Name Field Border Color Changes After Click**

1. User verifies that the Name field border color is `rgba(0, 0, 0, 0.42)` (before clicking)
2. User clicks on the Name field
3. User verifies that the Name field border color is `#304ffe` (after clicking)

TC-31**Validate Name Field Border Turns Red After Clearing Invalid Input**

1. User verifies that the Name field border color is `rgba(0, 0, 0, 0.42)` (before any input)
2. User types "aaa" into the Name field
3. User clicks on the Send button
4. User clears the Name field
5. User verifies that the Name field border color is `#d32f2f`

Events Page TC-32 – TC-35

SETUP (BEFORE EACH TEST)

User opens <http://localhost:3000/> in a maximized window, clicks on the Events button, and verifies the URL is <http://localhost:3000/events>.

TC-32

Validate "test title" Event Details

1. User clicks on the event with the title "test title"
2. User verifies the current URL is <http://localhost:3000/events/e8b1cd55-22c5-41c5-a339-dc819fe25a26>
3. User verifies the event image URL is https://cdn.pixabay.com/photo/2014/06/03/19/38/road-sign-361514_640.png
4. User verifies the event title is "test title"
5. User verifies the event date is "2025-12-07"
6. User verifies the event location is "test location 100"
7. User verifies the event description is "test description 100"

TC-33

Validate Back to Events Button

1. User clicks on the first event in the list
2. User clicks on the Back to Events button
3. User verifies the current URL is <http://localhost:3000/events>

TC-34

Validate Back Button Color

1. User clicks on the first event in the list
2. User verifies that the Back button color is [#9c27b0](#)

1. User clicks on the event with the title "Car Meet"
2. User verifies the current URL is <http://localhost:3000/events/d1e13a92-9964-4fe5-b064-5e5c97138882>
3. User verifies the event image URL is <https://dealerimages.dealereprocess.com/image/upload/3870158>
4. User verifies the event title is "Car Meet"
5. User verifies the event date is "2026-02-04"
6. User verifies the event location is "Vienna Airport"
7. User verifies the event description is "We are inviting you to the biggest car meet in Austria ,Want to come with you car and be seen ? Sign up for free"

Create Event Page TC-36 – TC-40

SETUP (BEFORE EACH TEST)

User opens `http://localhost:3000/`, clicks the Login menu button, logs in with "final.project@creativehub.mk" / "creativeHub123!", hovers over the Add Event button, then clicks Create Event.

TC-36

Validate Create Event Form Field Placeholders

1. User verifies the Event Title field placeholder is "Event Title"
2. User verifies the Event Image field placeholder is "Event Image"
3. User verifies the Event Date field placeholder is "Event Date"
4. User verifies the Event Location field placeholder is "Event Location"
5. User verifies the Event Description field placeholder is "Event Description"

TC-37

Validate CREATE EVENT Button Color and Text

1. User verifies that the CREATE EVENT button color is `#304ffe`
2. User verifies that the CREATE EVENT button text is "CREATE EVENT"

TC-38

Validate CREATE EVENT Button Font

1. User verifies the font family of the CREATE EVENT button is "Josefin Sans"
2. User verifies the font style of the CREATE EVENT button is "normal"

TC-39

Validate Event Title Field Border Thickens on Hover

1. User verifies that the Event Title field border width is "0.8px" (before hovering)
2. User hovers over the Event Title field
3. User verifies that the Event Title field border width is "1.6px" (after hovering)

1. User types "New Automated Title" into the Event Title field
2. User types an image URL into the Event Image field
3. User types "03.07.2026" into the Event Date field
4. User types "Automated Location" into the Event Location field
5. User types "Automated Description" into the Event Description field
6. User clicks the CREATE EVENT button
7. User clicks on the event with title "New Automated Title"
8. User verifies the title, image URL, date, location, and description match the submitted values
9. User navigates to <http://localhost:3000/events>
10. User clicks on the event with title "New Automated Title"
11. User clicks the Delete Event button, then confirms deletion
12. User verifies that the event has been deleted

Create, Update & Delete Event TC-41 – TC-44

SETUP (BEFORE EACH TEST)

User logs in, navigates to Create Event, and submits a new event: Title "New Automated Title", Image URL, Date "03.07.2026", Location "Automated Location", Description "Automated Description".

TEARDOWN (AFTER EACH TEST)

User navigates to the Events page, opens "New Automated Title", deletes it, confirms deletion, and verifies it no longer exists.

TC-41

Validate Newly Created Event Details

1. User clicks on the event with the title "New Automated Title"
2. User verifies the event title is "New Automated Title"
3. User verifies the event image URL matches the submitted value
4. User verifies the event date is "03.07.2026"
5. User verifies the event location is "Automated Location"
6. User verifies the event description is "Automated Description"

TC-42

Validate Button Colors on Event Detail Page (Including Delete Confirmation)

1. User clicks on the event with the title "New Automated Title"
2. User verifies that the Edit button color is #304ffe
3. User verifies that the Delete button color is #d32f2f
4. User clicks on the Delete button
5. User verifies that the Delete confirmation button color is #d32f2f
6. User verifies that the No button color is #9c27b0
7. User clicks on the No button

TC-43

Cancel Deleting an Event

1. User clicks on the event with the title "New Automated Title"
2. User clicks on the Delete button
3. User clicks on the No button
4. User verifies that the event has NOT been deleted

TC-44

Edit and Validate Updated Event Details

1. User clicks on the event with the title "New Automated Title"
2. User clicks on the Edit button
3. User clears all fields (Title, Image, Date, Location, Description)
4. User types "new test automation" into the Event Title field
5. User types a new image URL into the Event Image field
6. User types "07.04.2026" into the Event Date field
7. User types "test location" into the Event Location field
8. User types "test description" into the Event Description field
9. User clicks the Update Event button
10. User verifies the title, image URL, date, location, and description all reflect the updated values
